SUMMARY

I'm Junior Software Developer. I am looking a job in information technology sector. I have basic knowledge about HTML, CSS, Python and C# programming languages. I have worked with SQL and PHP databases but at an entry level. I have experience creating a virtual machine in VirtualBox, based on the Ubuntu operating system and configuring it using cmd commands. I know how to use Github service and store all me projects there. I'm very curious and always like to learn something new. I have also experience with Digital Marketing and Web Development on CMS platforms. I know some terms about marketing in internet, for example SEO, SEM, SMM.
